Dear Kenneth:

Per our discussion, attached please find a completed EPA Notification of Hazardous Waste Activity form for the former Wagner Electric facility, which is located in Wellston, MO. Cooper Industries is currently negotiating a site remediation plan with Region VII EPA personnel. The proposed cleanup activities will involve the generation of hazardous waste in the form of PCB contaminated soil and debris, as well as plating operation debris.

Based on the above information, it is necessary that the plant's previous EPA ID number be reissued. If you have any questions give me a call. Thank you for your assistance in this matter.

Sincerely,

Michael J. O'Brien
